

# iPhone & Android Live Scoring Instructions

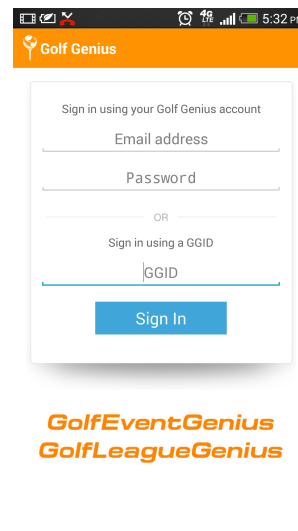

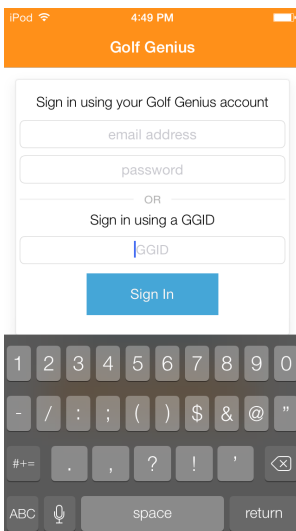

## iPhone

## Android

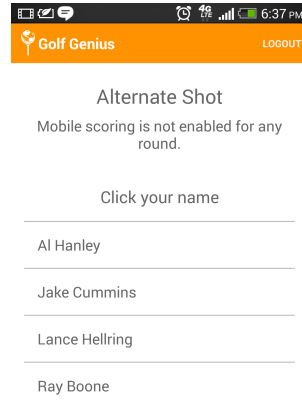

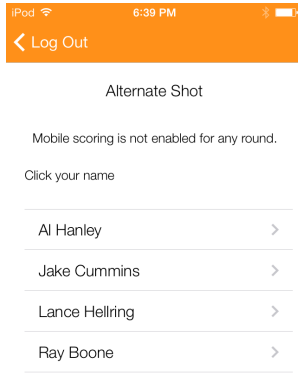

1. Go to the app store and download the “Golf Genius” app. iPhone users please be careful as the first app found when searching for the “Golf Genius” app is actually the app for our GolfTripGenius site. You will need the app shown below titled “Golf Genius.”

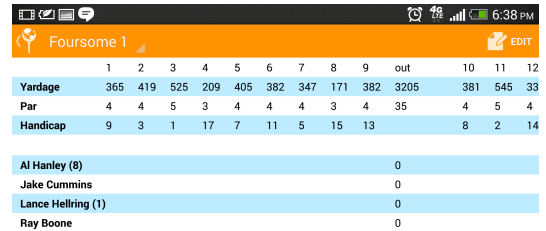

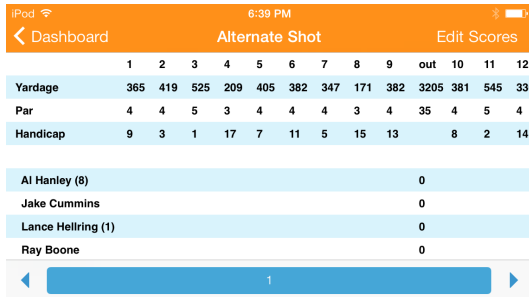

2. Once the app is downloaded open it and sign in using the “GGID” field. The “GGID” for the foursome will be printed at the bottom right corner of your scorecard.

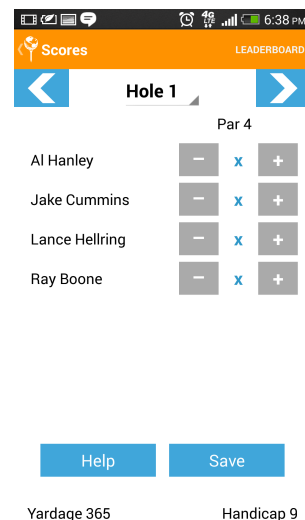

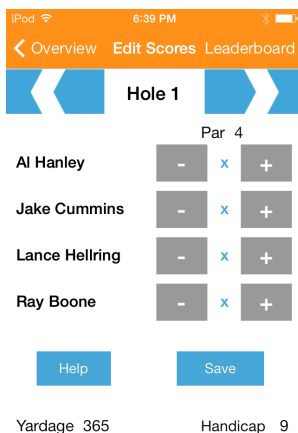

3. Once you've signed in using the "GGID" click on your name from the list of players in the foursome.

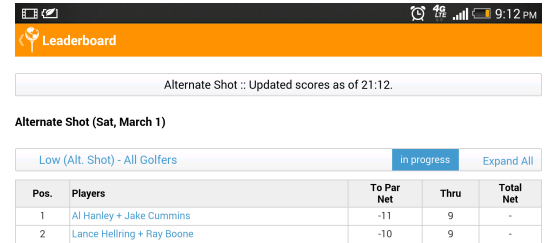

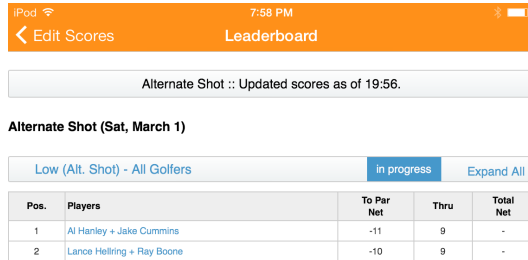

4. After you've clicked your name, you will be automatically directed to your foursomes scorecard whenever live mobile scoring has been activated by the professional staff. Press "Edit Scores" on the iPhone or "Edit" on the Android to start entering each hole's score.

5. To enter scores click the "+" and "-" buttons. The first click will take you to par and each additional click will continue in the direction you press. After all scores are entered press save. To view the live leaderboard, click "leaderboard."

6. While in the leaderboard anything in “blue” will be interactive, meaning you can click it to reveal more information. For example click on your team to reveal hole by hole scores. You can navigate back to the score entry by clicking “Edit Scores” on the iPhone or the little ball and tee logo in the upper left corner for Android users.

7. Lastly, at any time you can navigate back to the Dashboard by using the navigational buttons in the upper left corner of the app. From the Dashboard you can:

- Scoring – click here to be directed back to the scorecard and enter scores
- Member Portal – Results, Tee Times, and Player Stats can be found here amongst other useful pages
- Real-Time Leaderboard – to be directed to the current live leaderboard
- Player Gross / Net – to see an individual players gross and net score in comparison to the field (not applicable for the alternate shot format)
- Tee Sheets – to view any pairings that have been released by the professional staff
- Upload Photos – to take and view photos directly from the app before, during, or after the round.
